Thank you very much for reading aeromagnetic structural interpretation and evaluation of. As you may know, people have look numerous times for their chosen novels like this aeromagnetic structural interpretation and evaluation of, but end up in infectious downloads.

Rather than reading a good book with a cup of tea in the afternoon, instead they are facing with some malicious virus inside their computer.

aeromagnetic structural interpretation and evaluation of is available in our book collection an online access to it is set as public so you can get it instantly.

Our books collection spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the aeromagnetic structural interpretation and evaluation of is universally compatible with any devices to read

Aeromagnetic Structural Interpretation And Evaluation

Abstract. Evaluation and structural interpretation of aeromagnetic anomalies over parts of Monguno and environs, northeastern Nigeria was carried out using 3Euler deconvolution to -D determine the presence, distribution and depth of intrusives in the area. Analysis of maps and images provided the basis for qualitative as well as quantitative interpretations of the aeromagnetic data so as to obtain information on the presence, depth and distribution of intrusives in the area.

Aeromagnetic surveys are a widely recognized exploration technique in mineral exploration especially in covered terranes. They are often not used to their full potential, with direct anomaly targeting and lineament analyses conducted but little else. The real value in aeromagnetic data can be unlocked by integrating multiple data sets into the interpretation of the data with the aim to produce a coherent geological map which outlines the structural and geological history.

Advanced Geological Interpretation Of Aeromagnetic Data ...

Based on the short course "Geological Interpretation and Structural Analysis of Aeromagnetic Data" conducted by the authors since 1995, the book aims to provide readers with the basic qualitative observation and interpretation skills necessary for integration of aeromagnetism with geology. It is suited to both explorers and mappers, and covers the basic targeting concepts used in mineral, hydrocarbon and groundwater exploration.

A detailed structural interpretation and re-evaluation of the magnetic basement depth in the study area was carried out using 3-D Standard Euler deconvolution and spectral inversion techniques. The presence of intrusive bodies in some parts of the study area suggests that some parts of the area are more tectonically active than others.

Structural interpretation was also carried out on the contoured aeromagnetic data with a view of locating structures that may possibly accommodate ore bodies. 2 GEOLOGY OF THE STUDY AREA.

MAGNETI DEPTH REVALUATION OF /I E S N D

Abstract This paper presents a detailed geological interpretation of the aeromagnetic data over Naraguta and environs using 2-D spectral inversion and 3-D Euler deconvolution techniques. The objectives of the study are to re-evaluate the depth to the magnetic basement and to delineate associated structural features in the study area.
