## ~~The Problem With Technology In Today's Society~~

Technology and human life cannot be separated; society has a cyclical co-dependence on technology. We use technology; depend on technology in our daily life and our needs and demands for technology keep on rising. Humans use technology to travel, to communicate, to learn, to do business and to live in comfort.

Feudalism. One of the consequences of Iron Triangles is oligarchy, and decisions being made in the interest of a ruling clique, and not in the national interest. The problem when governance, regulation, and taxation is weak, and special interest groups that are supposed to be governed, regulated, and taxed grow over-powerful, is what we are calling techno-feudalism.

~~Technology in Society—Elsevier~~  
Science, technology, society and environment education, originates from the science technology and society movement in science education. This is an outlook on science education that emphasizes the teaching of scientific and technological developments in their cultural, economic, social and political contexts. In this view of science education, students are encouraged to engage in issues pertaining to the impact of science on everyday life and
